

3 ≠ auto drive vehicle — auto pilot category.

3 ≠ roomba

1. Google maps

2. Siri

4. C-3PO (Star wars)

AI — is uncertainty management.

AI — is what we do, when we do not know what to do.

Reason for uncertainty:

- 1) sensor limits
- 2) Software script is lazy
- 3) stochastic environment : meaning a unpredictable event or situation due to randomness of the variable.
